Metropolis GZM. The first Metropolis in Poland

The 41 cities and municipalities, approx. 2.3 million inhabitants, and about 240 thousand companies and enterprises that make up GZM produce 12.4% of Polish GDP and 14% of exports.

The Metropolis sees its role primarily as that of an integrator, inspirer and coordinator. It is an active participant in the process of building a knowledge-based economy; coordinating the cooperation of entities operating in the Metropolis; and facilitating development of the key industries in the region.

It was one of 30 European metropolises to sign the Rome Declaration at the European Metropolitan Authorities (EMA) Forum. The declaration emphasized that key role played by metropolises in supporting European cities as they fight against the issues related to spatial planning, low-stack emissions and public transport.

Katowice - a city for the future!

In terms of economic potential, human capital, lifestyle, cost effectiveness and connectivity Katowice is currently ranked #1 in the prestigious „Polish Cities of the Future 2019/20” ranking published by the Financial Times.

A symbol of Polish economic success and development, Katowice has the 16th highest GDP among cities in the entire European Union. It is home to over 47,000 business and allocates as much as 27% of the city's budget is allocated to infrastructure investments. It is also home to the Katowice Special Economic Zone - a 2,614 ha area that's drawn more than 7.5 billion Euro in investments and created over 75,000 jobs.

The city is looking to provide a sustainable development for its citizens - in a technological, cultural, social and economic sense. It is focused on utilizing the potential of its residents in carrying out the "Katowice 2030 strategy". The four main pillars of the of the aforementioned approach include: intelligence, innovation, integration and internationalism.
